Career Objective

Aspiring Software Development Engineer with hands-on experience building scalable backend systems, full-stack applications, and Agentic AI solutions using Java, Python, Spring Boot, FastAPI, React.js, REST APIs, microservices, cloud technologies, and Retrieval-Augmented Generation (RAG).

Technical Skills

Languages: Python, Java, SQL, JavaScript

Frameworks: Spring Boot, FastAPI, React, Flask. REST APIs, Microservices

AI/ML: Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, LangGraph, Agentic AI, Prompt Engineering, OCR, Hugging Face Embeddings, Whisper

Databases: PostgreSQL, MySQL, Redis, PGVector, MongoDB

Cloud & DevOps: AWS (EC2, S3), Git, Docker, Postman, GitHub Actions

Achievements

- Published Research Paper: *Hand Gesture-Based Presentation Control System*, JETIR Journal | View Paper
- Solved 100+ DSA problems on LeetCode and GeeksforGeeks, strengthening problem-solving skills.

Experience

KodNest – Full Stack Development

Feb 2026 – May 2026

- Developed REST APIs and backend services using Java, Spring Boot, SQL, and React while following Agile and SDLC practices.
- Optimized SQL queries, debugged application issues, and improved software reliability through testing and API integration.

MindMatrix.io – Generative AI Intern

Feb 2026 – May 2026

- Built RAG-based AI workflows using LLMs, prompt engineering, and vector search for intelligent document understanding.
- Optimized semantic retrieval and API integration to improve contextual response quality and automation.

Projects

Multimodal AI Assistant | View Project

Python, RAG, LLMs, Whisper, FastAPI

- Designed an agentic AI platform that transforms documents, images, audio, and video into searchable knowledge, generating context-aware answers, summaries, quizzes, flashcards, and multilingual outputs.
- Engineered a resilient retrieval pipeline with semantic search, conversation memory, multi-LLM fallback routing, and Redis caching to improve response reliability and scalability

WellKart AI Try-On Platform | View Project

Spring Boot, FastAPI, PostgreSQL, Redis, Docker

- Developed an AI-driven fashion platform that aggregates products across multiple e-commerce sources, enabling virtual try-on, price comparison, and personalized recommendations.
- Designed modular backend services with secure authentication, scalable APIs, and cloud-ready architecture supporting AI inference and third-party integrations.

Black Pepper Adulteration Detection System | View Project

Python, Flask, YOLOv8, MobileNetV2

- Developed a computer vision system to identify black pepper adulteration from mixed samples, achieving 95% classification and 90% detection accuracy.
- Improved prediction reliability through dataset preprocessing, augmentation, and statistical evaluation using Precision, Recall, F1-score, and Confusion Matrix.

Education

Bachelor of Engineering (CSE)

2022 – 2026

Srinivas Institute of Technology, Mangalore

CGPA: 8.0

Certifications

- IT Specialist – Artificial Intelligence (Certiport)** | View Certificate
- Python Essentials 2 (Cisco)** | View Certificate
