Career Objective

Aspiring Software Development Engineer with hands-on experience building AI-powered and full-stack applications using Java, Python, Spring Boot, FastAPI, PostgreSQL, Docker, and AWS. Passionate about building scalable, production-ready software and AI solutions.

Technical Skills

Languages: Python, Java, SQL, JavaScript

Backend: FastAPI, Spring Boot, Flask, REST APIs, Microservices

Frontend: React, TypeScript, Next.js

AI & GenAI: LangChain, LangGraph, Agentic AI, RAG, LLM Inferencing, Prompt Engineering, Embedding Models, Semantic Search, Vector Search, OCR

Databases: PostgreSQL, PGVector, Redis, MySQL, MongoDB

Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Postman

Experience

MindMatrix.io – Generative AI Intern

Feb 2026 – May 2026

- Developed Retrieval-Augmented Generation (RAG) pipelines using LangChain, embedding models, and vector search to improve contextual document understanding.
- Built semantic retrieval APIs integrating LLMs with enterprise documents through prompt engineering and intelligent workflow automation.

KodNest – Full Stack Development

Feb 2026 – May 2026

- Developed backend services using Java, Spring Boot, SQL, and REST APIs for scalable web applications.
- Integrated React frontend with Spring Boot backend and optimized SQL queries.

Projects

Multimodal AI Assistant | View Project

Python, RAG, LLMs, Whisper, FastAPI

- Designed and developed an Agentic AI platform supporting multimodal document processing across PDF, image, audio, and video using FastAPI, LangChain, LangGraph, and PostgreSQL.
- Built Retrieval-Augmented Generation (RAG) pipelines implementing document ingestion, OCR, semantic chunking, embedding generation, vector retrieval, and LLM-powered question answering.
- Developed modular AI agents for summarization, quiz generation, flashcards, study notes, glossary generation, and workflow orchestration through LangGraph.
- Architected scalable backend microservices integrating Gemini, OpenAI, and Ollama through a centralized LLM Manager while containerizing services with Docker for cloud-ready deployment.

WellKart AI Try-On Platform | View Project

Next.js, Spring Boot, FastAPI, PostgreSQL, Redis, Docker

- Developed scalable backend services using Java, Spring Boot, FastAPI, PostgreSQL, and REST APIs for an AI-powered commerce platform.
- Implemented product aggregation, virtual try-on integration, recommendation workflows, and backend APIs supporting scalable business operations.
- Designed modular microservices with Docker, Redis, JWT authentication, and cloud-ready architecture for third-party integrations.

Achievements

- Published Research Paper: *Hand Gesture-Based Presentation Control System*, JETIR Journal | View Paper
- Solved 100+ DSA problems on LeetCode and GeeksforGeeks, strengthening problem-solving skills.

Education

Bachelor of Engineering (CSE)

2022 – 2026

Srinivas Institute of Technology, Mangalore

CGPA: 8.0

Certifications

- **IT Specialist – Artificial Intelligence (Certiport)** | View Certificate
- **Python Essentials 2 (Cisco)** | View Certificate
