Career Objective

Aspiring Software Development Engineer skilled in Java, Python, SQL, Spring Boot, and REST API development. Experienced in building backend services, full-stack applications, and AI-powered software solutions through internships and projects. Passionate about problem-solving, scalable system design, and developing high-quality software.

Technical Skills

Languages: Java, Python, SQL

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering Principles

Frameworks & Technologies: Spring Boot, React.js, FastAPI, Flask, REST APIs

Databases: MySQL, PostgreSQL, Redis, MongoDB

Cloud & DevOps: AWS (EC2, S3), Git, Docker, CI/CD Fundamentals, Postman

AI Technologies: Machine Learning, Deep Learning, Computer Vision, GenAI, Agentic AI, LLMs, RAG

Achievements

- Solved 100+ DSA problems on LeetCode and GeeksforGeeks.
- Participated in Srinathon Hackathon and Project Exhibition, developing and presenting software solutions while demonstrating problem-solving and technical implementation skills.
- Published Research Paper: *Hand Gesture-Based Presentation Control System*, JETIR Journal | [View Paper](#)

Internship

KodNest – Java Full Stack Development Intern

Feb 2026 – May 2026

- Developed database-driven web applications using Java, Spring Boot, React.js, and SQL, implementing REST APIs and backend workflows for business use cases.
- Integrated frontend and backend components, performed debugging and testing, and contributed to the development of reliable and maintainable software solutions.

MindMatrix.io – Generative AI Intern

Feb 2026 – May 2026

- Developed AI-powered workflows using LLMs, prompt engineering, and API integrations to automate information retrieval, content generation, and task execution processes.
- Built and evaluated RAG-based application prototypes, integrating vector search, document retrieval, and LLM-powered response generation for intelligent automation use cases.

Projects

WellKart AI Try-On Platform | [View Project](#)

Spring Boot, FastAPI, PostgreSQL, Redis, Docker

- Built backend services using Spring Boot and FastAPI, integrating PostgreSQL for persistent storage and Redis for caching to optimize API response times and system performance.
- Containerized microservices using Docker and developed REST APIs to support scalable service communication and AI-powered user workflows.

Black Pepper Adulteration Detection System | [View Project](#)

YOLOv8, MobileNetV2, Python

- Developed and evaluated deep learning models using YOLOv8 and MobileNetV2 for black pepper adulteration detection, achieving 95% classification accuracy and 90% detection accuracy through dataset preprocessing, augmentation, and model optimization.
- Performed statistical model evaluation using Precision, Recall, F1-Score, and Confusion Matrix metrics, and deployed the solution using Flask and Hugging Face for real-time prediction.

Education

Bachelor of Engineering (CSE)

2022 – 2026

Srinivas Institute of Technology, Mangalore

CGPA: 8.0

Certifications

- IT Specialist – Artificial Intelligence (Certiport)** | [View Certificate](#)
- Python Essentials 2 (Cisco)** | [View Certificate](#)
- IT Specialist - Cloud Computing (Certiport)** | [View Certificate](#)
