Career Objective

Aspiring Software Development Engineer with strong foundations in Java, Python, SQL, Data Structures & Algorithms, and Full Stack Development. Experienced in designing REST APIs, backend services, and scalable software solutions using Spring Boot, React.js, FastAPI, PostgreSQL, Redis, and Docker. Passionate about building reliable systems and solving complex engineering problems.

Technical Skills

Languages: Python, Java, SQL

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering Principles

Frameworks & Technologies: Spring Boot, React.js, FastAPI, Flask, REST APIs

Databases: MySQL, PostgreSQL, Redis, MongoDB

Cloud & DevOps: AWS (EC2, S3), Git, Docker, CI/CD Fundamentals, Postman

AI Technologies: GenAI, Agentic AI, LLMs, RAG

Internship

KodNest – Full Stack Development Intern

Feb 2026 – May 2026

Developed full-stack applications using Java, Spring Boot, React.js, SQL, and REST APIs, gaining hands-on experience in backend development, debugging, integration testing, and software engineering practices.

MindMatrix.io – Generative AI Intern

Feb 2026 – May 2026

Worked on Generative AI and Agentic AI applications involving LLM-powered workflows, RAG-based systems, API integrations, and intelligent automation while following software engineering and Git-based development practices.

Projects

WellKart AI Try-On Platform | View Project

Spring Boot, FastAPI, PostgreSQL, Redis, Docker

- Designed and developed backend services and REST APIs using Spring Boot, FastAPI, PostgreSQL, Redis, and Docker following microservice architecture principles.
- Developed service integrations and containerized workflows to support scalable, maintainable, and high performance applications.

Hand Gesture Presentation Controller | View Project

Python, OpenCV, MediaPipe, PyAutoGUI

- Implemented MediaPipe hand landmark detection and OpenCV-based frame processing for low-latency real-time gesture recognition with 95%+ identification accuracy.
- Integrated PyAutoGUI to map finger gestures into slide navigation actions, enabling low-latency touch-free presentation control and improving interaction efficiency by 40%.

Black Pepper Adulteration Detection System | View Project

Python, Flask, YOLOv8, MobileNetV2

- Built a web-based adulteration detection application using Python, Flask, and deep learning models for automated quality assessment.
- Deployed the application on Hugging Face, enabling real-time image-based prediction and user interaction.

Education

Bachelor of Engineering (CSE)

2022 – 2026

Srinivas Institute of Technology, Mangalore

CGPA: 8.0

Certifications

- IT Specialist – Artificial Intelligence (Certiport)** | View Certificate
- Machine Learning Fundamentals Micro-Credential (Alteryx)** | View Certificate
- Python Essentials 2 (Cisco)** | View Certificate
- Big Data Computing (NPTEL)** | View Certificate
- IT Specialist - Cloud Computing (Certiport)** | View Certificate
- No SQL - MongoDB (IBM)** | View Certificate

Achievements

- Published Research Paper: *Hand Gesture-Based Presentation Control System*, JETIR Journal | View Paper
